New & Improved Bin Liners!

We've taken your feedback on board.

Following concerns raised about our previous bin liners, we've worked closely with our manufacturer to deliver a significantly improved product at no extra cost to you!

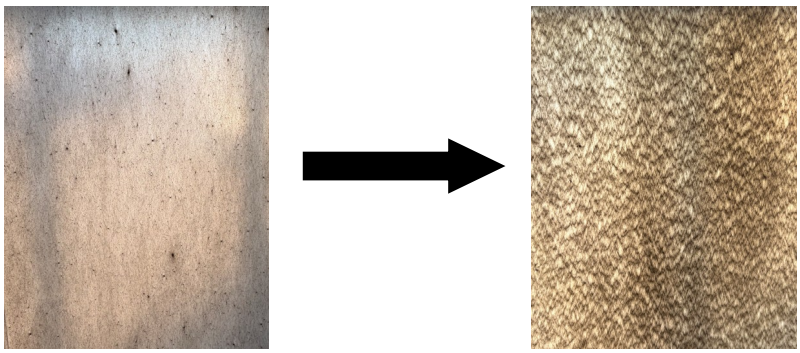
What's Improved?

- **Thicker Material** - Enhanced durability
- **More Consistent Strength** - No weak patches or thin spots
- **Easier to Open** - Less time separating bags
- **Improved Roll Sticker** - Reduced adhesion means the first liner no longer tears so you can use every bag you pay for
- **More Durable Packaging** - The outer cardboard carton is now stronger, helping the box maintain its shape without swelling
- **Less Plastic Waste** - We have reduced all unnecessary plastic in the packaging to create a more efficient and eco-friendly package

See the Difference

In the comparison image below, both liners have been held up to a window to allow light to shine through:

- The **old liner** shows visible inconsistencies
- The **new liner** is consistent and stronger throughout



OLD BIN LINER **NEW BIN LINER**

Prefer the Previous Version?

Our old bin liners are still available and we understand if you wish to continue using them. Please contact our office and we'll be happy to arrange this for you.
