## STAINLESS STEEL WIPES

These are pre-moistened with a unique citrus-based formula designed to clean and polish stainless steel surfaces while protecting them against the damaging effects of oxidation and corrosion.

Each wipe will remove hard-water stains, grease smudges, oily fingerprints, food spills and residue from virtually any stainless steel surface or appliance.

Use them to clean stainless steel panels in kitchens, food manufacturing facilities, office buildings, train stations, lifts, hand rails.

Use the non-scratching abrasive side of the wipe first to remove build up and stains and then turn the wipe over and use the softer side to polish the surface.

A soft microfibre cloth such as Micro-scrim can be used to finish off if you want finger print resistant surfaces, such as hand rails and door opening panels.

**This product is accepted for use in export registered meat establishments**

## FEATURES

- No harsh chemicals, leaves a pleasant citrus fragrance.
- Quickly wipes away heavy dirt to restore a brilliant shine.
- Leaves behind a protective coating which shines surfaces and preserves them from water marks and corrosion.
