- Disinfects
- Removes Most Organic Based Stains
- Suitable for Bleaching Mildew

DESCRIPTION

LEMON BLEACH is a light yellow liquid containing sodium hypochlorite equivalent to 4% w/w available chlorine. pH 12.0 - 12.5 S.G. 1.07.

LEMON BLEACH may be used for bleaching, stain removal, disinfection and deodorizing.

DIRECTIONS FOR USE

LEMON BLEACH can be used for white and colourfast cottons, removal of stains such as fruit, vegetable, grass, ink, collar dirt, nappy stains, egg, milk, coffee, tea, chocolate, wine, blood, scorch marks and mildew. It will disinfect and deodorise baths, showers, sinks, basins, cloths, dishwashers, stoves, glassware, chinaware, refrigerators, plasticware, toilet bowls & seats, tiles, lino and plastic garbage bins.

Stain removal: Use at the rate of 50ml per litre of cold water. Soak article in solution for 5 minutes. Rinse.

Whitening: Use at the rate of 5ml per litre of wash water for bleaching in washing machines. Always dilute before use; do not allow concentrated product to come in contact with clothes.

Disinfecting/deodorizing: Use at the rate of 50ml per litre for wiping down work surfaces, grout cleaning, cleaning of garbage bins etc. To disinfect babies' nappies, bottles etc., use at the rate of 5ml per litre of water.

SAFETY INFORMATION

Refer to the Material Safety Data Sheet before using the product. LEMON BLEACH in its concentrated form is classified as a Corrosive substance. When used at concentrations of less than 7%, however, this product is classified as non hazardous, according to the criteria of ASCC.

Typical in-use concentrations of this product fall below this level.

Refer to the MSDS for First Aid statement and other safety information.

All Jasol products, including LEMON BLEACH are inherently biodegradable.
