RINSE FREE SANITISER K10

DESCRIPTION

RINSE FREE SANITISER contains quaternary ammonium compounds. Its excellent germicide activity combined with its “no rinse” properties provides the complete sanitising program.

APPLICATION

RINSE FREE SANITISER is formulated as the final rinse sanitiser as part of the cleaning program in kitchen, canteen and food preparation areas. It can be used on any hard surfaces.

BENEFITS

- Broad spectrum biocidal activity against both gram positive and gram negative organisms.
- Rinse free formulation.

DIRECTIONS FOR USE

Apply **RINSE FREE SANITISER** using damp cloth or spray. No potable water rinse is required if surfaces are allowed to drain/dry completely.

RINSE FREE SANITISER can be applied by spraying, fogging or mopping onto the required surface.

HEALTH & SAFETY INFORMATION

See separate Material Safety Data Sheet available on request.
